

Dear All

The 2022 season was full of events.

Personally involved into the organization/administration of the wakeboard boat WORLD and EUROPEAN champs I had time to check the medals production.....but at the end it was a disaster. Despite the good quality of the raw material and the correct engraving on the front of the medals, the back side of them was a different story.

Engraving mistakes (see disabled medals , waterski medals in recetto, wrong- late shipment (cable wakeboard champs) and the incorrect centering of the engraving (see wakeboard boat medals) have contributed to have a final low quality result.

I recommended to Sid and Dominique to not pay the invoice until the end of our meeting just to discuss with you all the opportunity to apply an economic penalty to the medals factory.

During the wakeboard world champ I had a couple of discussions with Louis and José Antonio concerning mr Freddy Winter issue, occurring during the 2022 season.

One more time it is crucial to approve and apply as soon as it possible the legal discipline already discussed . Actually the lack of a correct and complete discipline prevented from dealing adequately the Freddy Winter affair forcing to find a compromise . This situation will never happen with our new discipline.

One more small news concerning me was my invitation by the Hellenic waterski & wakeboard federation to judge the national wakeboard boat Champs. Miss Mamali and the wakeboard Greek Community made a fantastic job. I met riders , judges and parents extremely motivated as well as in the waterski competitions already hosted in Greece.

This is my report.
